Business Friendly Regime?

I promised the owner of Trumbo that I would “try” to limit my newsletters to ASME, API, and National Board Code related items. Key word is “try”. However, I must comment on the recent Presidential election.

For the past eight (8) years I have signed my email with a quote from Thomas Jefferson; “ *The democracy will cease to exist when you take away from those who are willing to work and give to those who would not.*” Tuesday, November 8, I removed that statement from my signature.

Trump supporters, labeled by Hillary Clinton as: Despicable, Racist, Sexist, Homophobic, Xenophobic, and Islamophobic, decided to install someone in the Presidency who is a total outsider; someone that has never been in the political arena before, someone that actually understands how capitalism should work.

I hope President Elect Trump, delivers on his campaign promises and does not spend four (4) years blaming the Obama administration for any, and all, of the problems he has to face; as President Obama did with President Bush.

It is my understanding one of the first policies of the new administration will be to reduce corporate tax rates. This will allow businesses to expand and hire more employees.

The previous administration seemed to choke the life out of business with their constantly increasing regulations and taxes. I actually find it amusing that the US Government thinks they are capable of dictating how businesses should run when they themselves are the most inefficient entity I know.

I am looking forward to the business changes this administration will make starting in 2017.

And, If President Elect Donald Trump doesn't perform as promised, we can tell him, “ Your Fired”.

I want to take a moment and thank all of you for working with Trumbo in 2016 and we look forward to continuing that relationship in 2017 and beyond. Happy Holidays.
